

RATTASAT ONNOMDEE

Rangsit , Pathumthani | 063-527-8329 | rattasat.onn@gmail.com

GitHub Profile : <https://github.com/chxmpizy>

Aspiring Data Engineer with a strong interest in Big Data technologies, data processing, and scalable system design. Experienced in full-stack web development, including both frontend and backend development, with hands-on involvement in system design and optimization projects. Contributed to the design and development of route optimization algorithms for an electric shuttle system within a university environment using metaheuristic techniques such as Genetic Algorithm, Simulated Annealing, Particle Swarm Optimization, and Ant Colony Optimization. Passionate about building efficient data-driven solutions and continuously expanding expertise in data engineering.

TECHNICAL SKILLS

- **Programming Languages** : HTML, CSS, JavaScript, TypeScript, Python, SQL
 - **Frameworks & Libraries**: React, Next.js, Node.js(Express), Nest.js, TailwindCSS, Elysia.JS
 - **Database**: PostgreSQL, Prisma ORM , MongoDB, MySQL, Drizzle ORM
 - **DevOps** : Docker, AWS, Git, Github, Github Action
 - **Data Engineering (Learning)**: Apache Airflow, Apache Kafka, Apache Spark ,ETL/ELT Pipelines
 - **Tools** : Postman, VS code , Vercel, Supabase , Neon
-

WORK EXPERIENCE

Learn Lab 2025 : Soft Power Beyond AI

October 2025 - December 2025

- Presented FitForm, a fitness tracking concept using movement-based exercise analysis
- Contributed to idea generation, slide creation, and project presentation
- Selected as one of the Top 36 teams in the program and Gained experience in pitching and product concept development

True CyberSafe x TrueMoney Hackathon Thailand 2025

June 2025 - July 2025

- Brainstormed cybersecurity solutions to prevent online financial fraud and cyber theft.
- Collaborated in designing and prototyping a solution for user protection on digital financial platforms
- Gained experience in teamwork, problem-solving, and rapid product ideation under hackathon conditions

Internship - Software Engineer, Mee Solution Consulting CO.,LTD

June 2025 - July 2025

- Contributed to the development of Kaigai, a game-based learning web platform developed for MonkeyEveryday. Responsible for implementing user interface components and translating design concepts into functional and responsive web pages. Collaborated with senior developers to integrate frontend features with backend systems and improve overall usability.
-

PROJECTS

Electric Shuttle Route Optimization (In Progress) <https://github.com/chxmpizy/Electric-Shuttle-Route-Optimization>

- Developed a route optimization model for an electric shuttle transportation system within a university environment to improve routing efficiency and reduce travel distance.
- Implemented and evaluated metaheuristic algorithms including Genetic Algorithm (GA), Simulated Annealing (SA), Particle Swarm Optimization (PSO), and Ant Colony Optimization (ACO) to identify optimal routing solutions under predefined constraints.

Class Schedule Optimization https://github.com/chxmpizy/Class_Schedule

- Improved timetable generation under predefined constraints using a hybrid optimization approach combining Genetic Algorithm (GA) and Particle Swarm Optimization (PSO).
 - Developed constraint-based scheduling logic to increase schedule stability and reduce conflicts between resources and time slots.
-

EDUCATION

Thammasat University

2023 - Present (Expected 2027)

Bachelor of Science And Technology (Computer Science Major)

GPAX : 3.37
